Appendix B: Transliterated Texts

For readers who already know at least the rudiments of the Babylonian language, this appendix gives transliterated versions of most of the texts translated in Chapters 2–5 and in Appendix A, preceded by a list of the words that appear together with the standard translation used in the English versions of the texts (see the explanation on page 24). All transliterations are taken from Jens Høyrup, *Lengths, Widths, Surfaces: A Portrait of Old Babylonian Algebra and Its Kin*, New York: Springer, 2002. The philological notes have been left out. The present standard translations are, with a few exceptions, the same as those used in this volume.
